I am an Associate Senior Lecturer and Docent in climatology at the University of Gothenburg, Sweden, with 10 years of experience in polar research. I obtained my PhD in physical oceanography in 2015 from the University of East Anglia, UK, in collaboration with the UK Met Office. My research focusses on the transport of heat and salt by global deep waters and their interaction with the rest of the climate system at high latitudes, using global climate modelling, in-situ hydrographic data, and satellite remote sensing. I have so far received ca 1.5 M€ in competitive grants as main applicant, and the 2022 EGU OS Division Outstanding Early Career Scientist Award. I participated in four Antarctic and Arctic field campaigns, two as physical oceanography PI. I am a member of the Northern Oceans Regional Panel ([NORP](#)) sponsored by CLIVAR/CliC, and PI for the [MOSAIC](#) international expedition. I have supervised 4 BSc, 5 MSc, and 3 PhD students as well as 3 postdoctoral researchers.
